In the Claims

a' 1 Claim 1. (Amended) An interface having means for presenting
2 items for selection by a user of a data processing
3 system, and having means for executing the [selected]
4 items which are selected, said interface comprising:
5 means for representing a plurality of interface
6 objects in an object database; and
7 means for dynamically associating different ones of
8 said interface objects [into] with a plurality of
9 logical frame presentations based upon [the] data
10 within each of said different ones of said interface
11 objects.

In Claim 4, line 1, delete "2", and substitute therefor --3--.
